

Bosch Automotive Aftermarket wins supplier award from Toyota

Bosch's Automotive Aftermarket department received a Certificate of Recognition from Toyota Motor Europe (TME) at its Annual Business Meeting in acknowledgement of its parts supply service to the manufacturer throughout last year.

Bosch, which was the only aftermarket supplier to receive an award, supplies TME with over 700 different service parts and provides them with more than one million individual pieces every year.

The award for parts supply service was one of three awards presented to Bosch, the other two being presented to the Original Equipment division.
